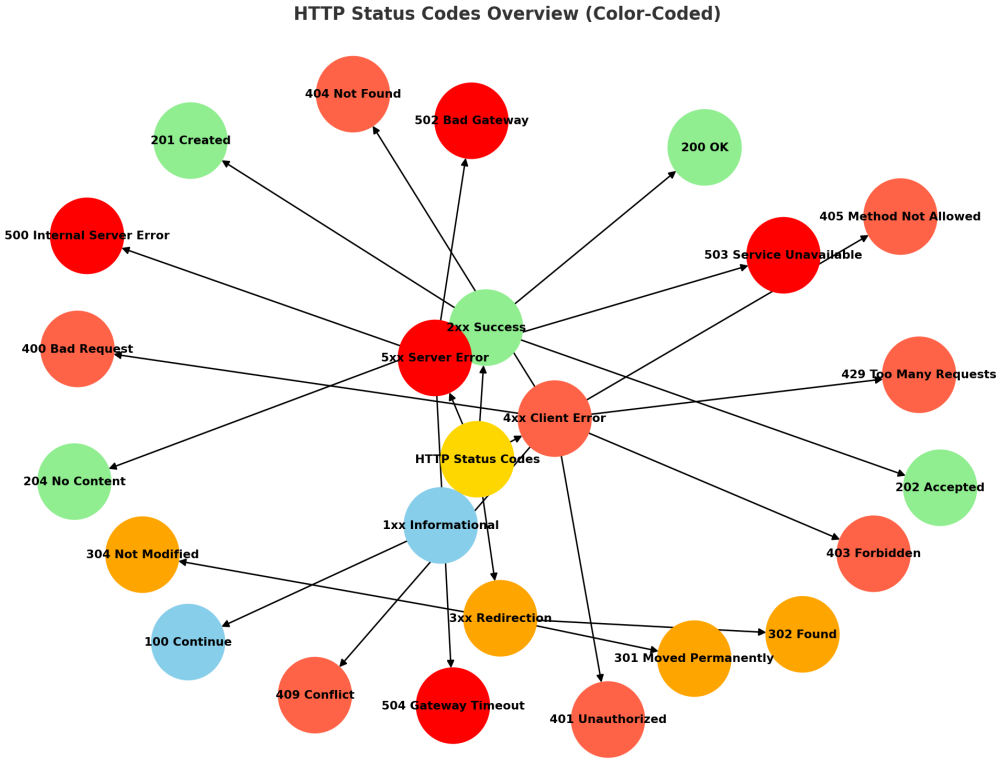
■ HTTP Status Codes Cheat Sheet

Code	Meaning	Usage	Example
100	Continue	Server says continue request	POST /upload with Expect: 100-continue
200	OK	Request succeeded	GET /users/1
201	Created	Resource created	POST /users
202	Accepted	Request accepted but not processed yet	POST /videos/encode
204	No Content	Success, no body	DELETE /users/1
301	Moved Permanently	Resource moved permanently	GET /old → /new
302	Found	Temporary redirect	GET /temp → /temp-new
304	Not Modified	Cached version valid	GET /image.png
400	Bad Request	Invalid request syntax/data	Broken JSON
401	Unauthorized	Auth required	GET /account without login
403	Forbidden	Not allowed	DELETE /admin/settings
404	Not Found	Resource missing	GET /product/9999
405	Method Not Allowed	Wrong HTTP method	PUT /users
409	Conflict	Request conflicts with state	Duplicate email
429	Too Many Requests	Rate limiting	100 requests in 1s
500	Internal Server Error	Generic server error	Bug in backend
502	Bad Gateway	Proxy got invalid response	Nginx upstream fail
503	Service Unavailable	Server overloaded/down	High traffic
504	Gateway Timeout	Upstream server too slow	DB/API timeout

Mindmap Overview



HTTP Status Codes Overview (Color-Coded)
404 Not Found
502 Bad Gateway
201 Created
200 OK
405 Method Not Allowed
500 Internal Server Error
503 Service Unavailable
2xx Success
400 Bad Request
5xx Server Error
429 Too Many Requests
4xx Client Error
HTTP Status Codes
204 No Content
202 Accepted
1xx Informational
304 Not Modified
403 Forbidden
3xx Redirection
302 Found
100 Continue
301 Moved Permanently
409 Conflict
504 Gateway Timeout
401 Unauthorized
